

ATERA ROOF BOXES

*** Safeguard System

The unique Atera Safeguard System allows you to travel assured.

Just like car doors, you can now open and close your Casar roof box more conveniently. And once the lever is lying in the recess, the roof box is 100% closed. Even if for once you should forget to withdraw your key. The box is and remains closed!

If the lever is sticking out, it signals to you that your roof box is not yet locked.

Atera Casar L and XL.

safeguard system

Open & Close Assist

The lifting and lowering mechanism integrated into the Safeguard system offers even more convenience.

While opening the lever, the locking mechanism is released and simultaneously the roof box lid is slightly raised.

While closing the lever, exactly the opposite occurs. When the roof box lid is closed correctly, the lever enters its position and locks the box.

Atera Casar L and XL.

Atera Certo.
Excellent performance at a fair price.

The magazine „auto motor und sport“, issue 22/2018, the Atera roof box Certo 460 to the test winner. The box scored first-class in all areas: 1. construction and handling / 2. driving tests / 3. crash test.

The test winner from Atera is in the midfield in terms of price - a clear proof that premium technology, security and function from the Allgäu are affordable for every car owner.

* Premium-Fit

After positioning the box on the cross bars, only the PREMIUM-Fit closure needs to be tightened. On reaching the optimum tightening torque, the rotary fastener clicks through audibly. The rubberised retaining claws below the box close around the cross bar and are centred automatically.

** Master-Fit

Lay the box on the roof bars. Position the box correctly and tighten the Master-Fit closure – done. The retaining claws under the box close firmly around the cross bar and are centred automatically. Only the red button needs to be pushed down and the box is secured. The retaining claws are rubber sheathed to protect the cross bar.

Comfort-Fit

Optional fixation system for the T-slot of aluminium cross bars. This simple fixation not visible externally is an alternative to the retaining claw fixation. After the initial pre-mounting of the T-fixture to the roof box, the latter can be inserted via the T-slot of the aluminium profile. The turning handles are firmly tightened – the box is securely fixed in place.

Comfort Fitting
Optional. Item No.: 082 266

For easy mounting in the T-Slot of aluminium cross bars. Theft-proof.

Roof Box Lift
Item No.: 082 195

Ideal for the storage of the roof box, e.g. in a garage. Simple mounting.

Lowered base

The benefit of lowering the floor is more than just additional space. The elegant transition to the vehicle design and the wind tunnel values clearly reveal the extra value of Atera roof boxes.

Dynamic opening

Innovative and convenient. The spring-loaded lifting mechanism assists when opening and closing the lid (even at low temperatures).

Dual-Side

Perfect access for loading – whether mounted on the right or left side of your car. Atera roof boxes with Dual-Side lid opening offer an all around convenience.

Luggage protection

To ensure your luggage is held firmly, it can be secured with the internal lashing straps.

Features (all): Cargo lashing straps, lashing eyes, dynamic opening system, central locking, quick fix system to roof bars
